The Fourth Sheet

Example report · SMEs

SAMPLE DATA · invented figures for demonstration

What does it cost to win a customer?

Period: October 2025. Marketing spend divided by the customers it actually brought in (a customer's first ever job), month by month.

How final is this data?

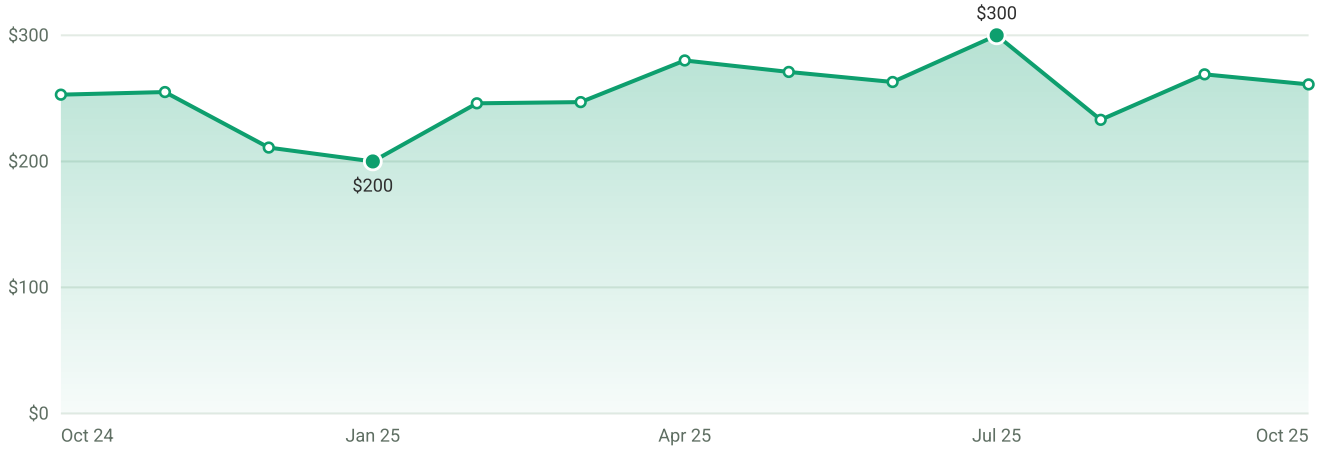

October 2025 Locked October 2025 is locked (closed 4 Nov 2025). These numbers won't change.

In short: $261 per new customer in October: 33 new customers from $8,600 of marketing.

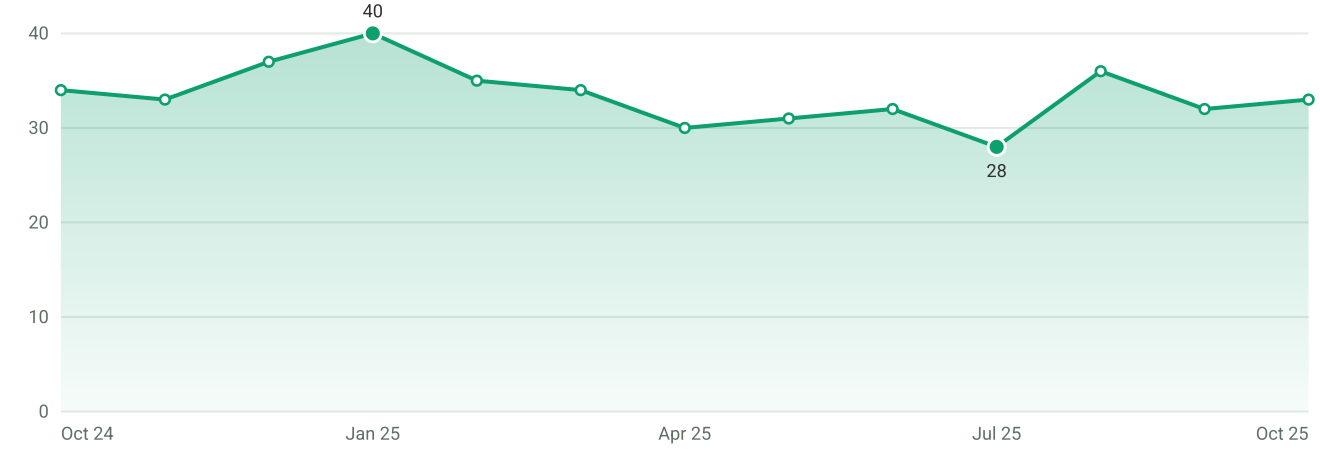

October 2025	October last year	Year to date (Jul to Oct 2025)
$261	**$253**	**$264**
September $269	34 new customers from $8,600	same period last year: not in the data

Cost to win a customer, by month

All · $ per new customer

All · New customers

Customers are counted in the month of their first job. Every month, by line, is in the spreadsheet download.

What it shows

33 new customers came from $8,600 of marketing in October, against 32 from $8,600 in September: $261 each, down from $269.

What you'd do about it

A lower cost per customer with steady spend usually means the marketing mix is working. Recording where each new customer came from shows the cost per channel.
