The Fourth Sheet

Example report · SMEs

SAMPLE DATA · invented figures for demonstration

What does it cost to win a customer?

Period: November 2025. Marketing spend divided by the customers it actually brought in (a customer's first ever job), month by month.

How final is this data?

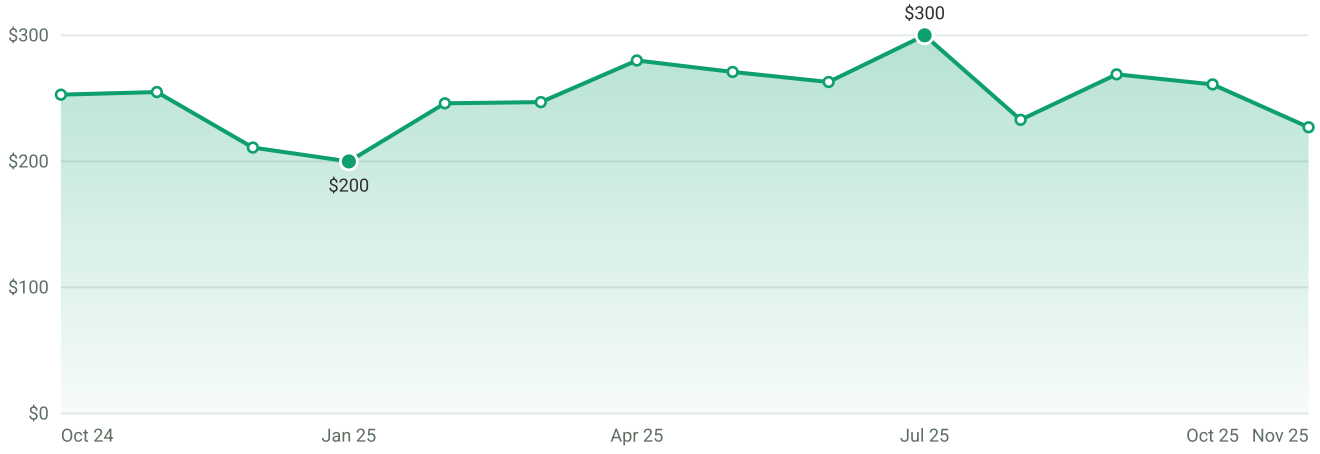

November 2025 Locked November 2025 is locked (closed 2 Dec 2025). These numbers won't change.

In short: $227 per new customer in November: 37 new customers from $8,400 of marketing.

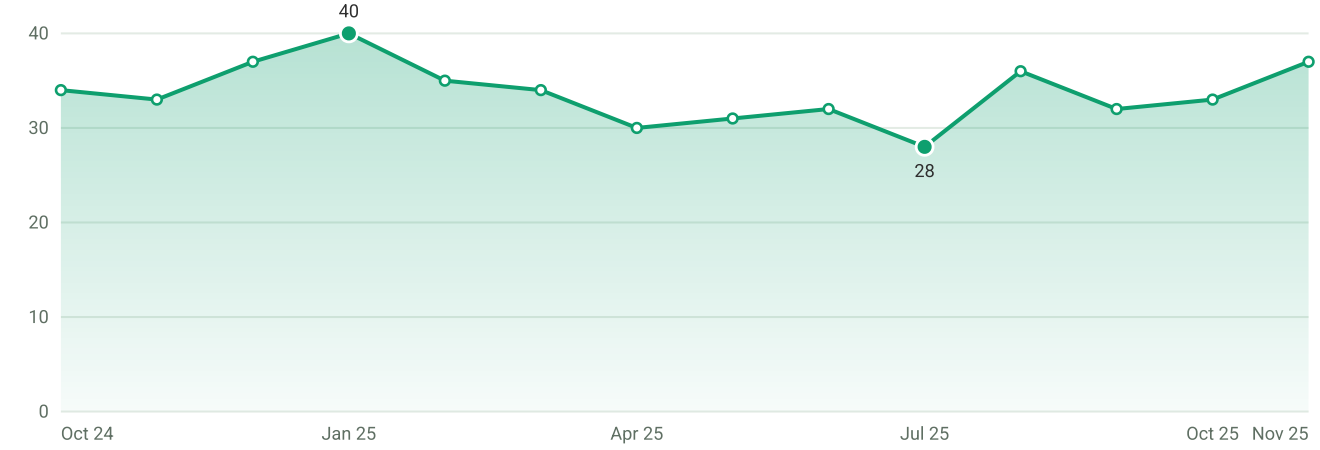

November 2025	November last year	Year to date (Jul to Nov 2025)
$227	**$255**	**$255**
October $261	33 new customers from $8,400	same period last year: not in the data

Cost to win a customer, by month

All · $ per new customer

All · New customers

Customers are counted in the month of their first job. Every month, by line, is in the spreadsheet download.

What it shows

37 new customers came from $8,400 of marketing in November, against 33 from $8,600 in October: $227 each, down from $261.

What you'd do about it

A lower cost per customer with steady spend usually means the marketing mix is working. Recording where each new customer came from shows the cost per channel.
