The Fourth Sheet

Example report · SMEs

SAMPLE DATA · invented figures for demonstration

What does it cost to win a customer?

Period: December 2025. Marketing spend divided by the customers it actually brought in (a customer's first ever job), month by month.

How final is this data?

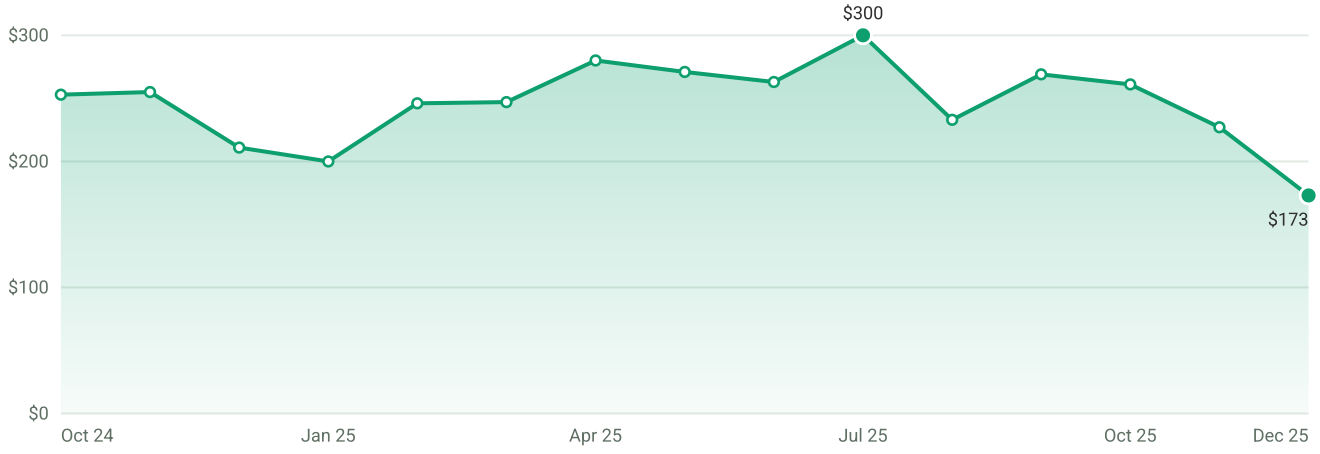

December 2025 Locked December 2025 is locked (closed 5 Jan 2026). These numbers won't change.

In short: $173 per new customer in December: 45 new customers from $7,800 of marketing.

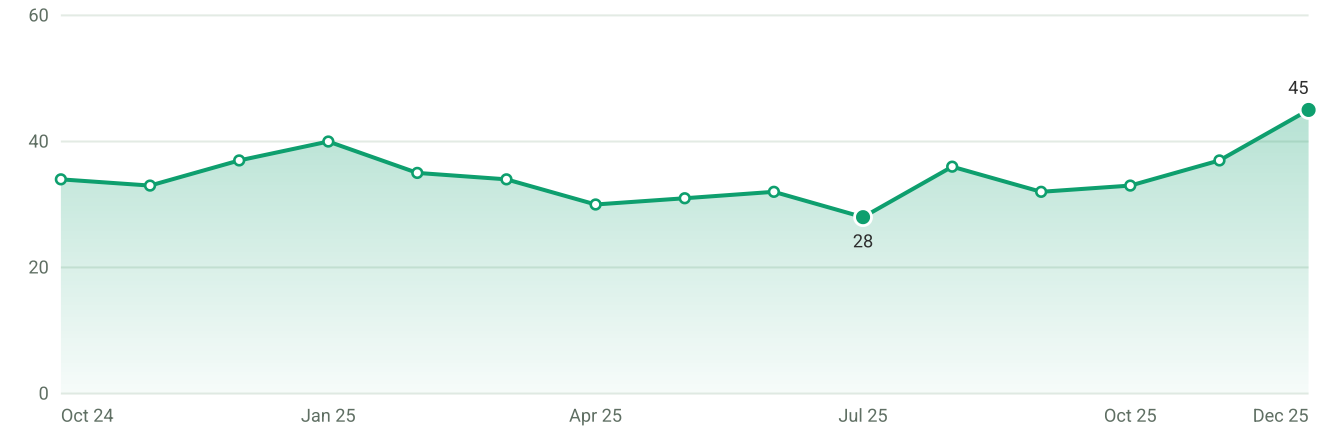

December 2025	December last year	Year to date (Jul to Dec 2025)
$173	**$211**	**$238**
November $227	37 new customers from $7,800	same period last year: not in the data

Cost to win a customer, by month

All · $ per new customer

All · New customers

Customers are counted in the month of their first job. Every month, by line, is in the spreadsheet download.

What it shows

45 new customers came from $7,800 of marketing in December, against 37 from $8,400 in November: $173 each, down from $227.

What you'd do about it

A lower cost per customer with steady spend usually means the marketing mix is working. Recording where each new customer came from shows the cost per channel.
