The Fourth Sheet

Example report · SMEs

SAMPLE DATA · invented figures for demonstration

What does it cost to win a customer?

Period: March 2026. Marketing spend divided by the customers it actually brought in (a customer's first ever job), month by month.

How final is this data?

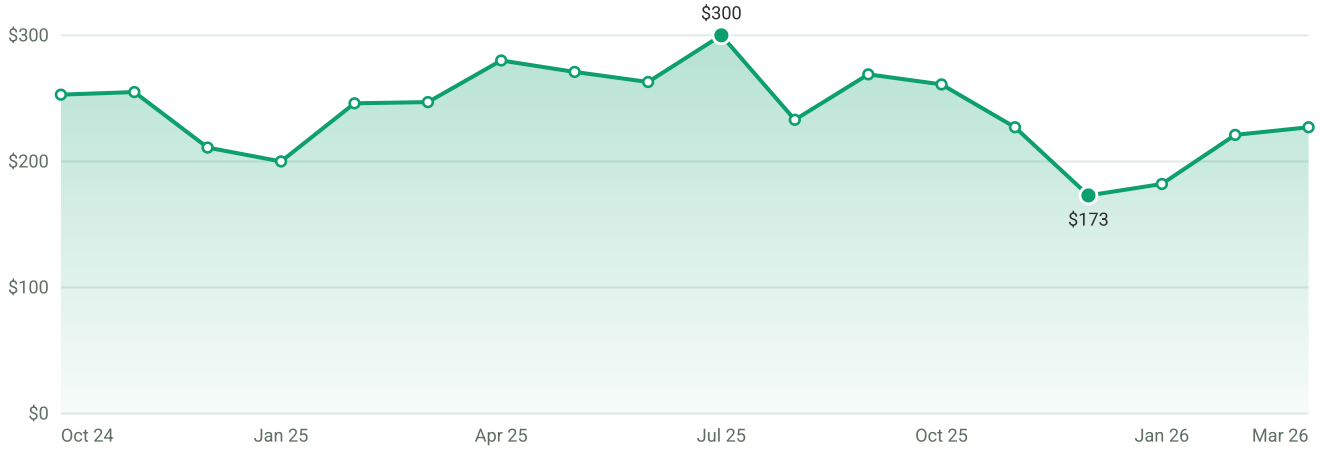

March 2026 Locked March 2026 is locked (closed 2 Apr 2026). These numbers won't change.

In short: $227 per new customer in March: 37 new customers from $8,400 of marketing.

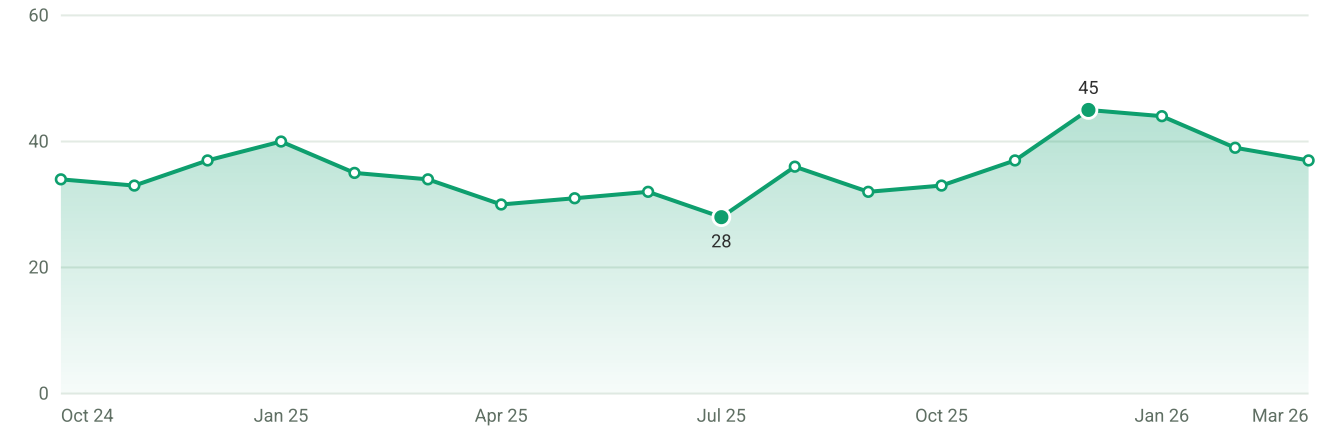

March 2026	March last year	Year to date (Jul to Mar 2026)
$227	**$247**	**$227**
February $221	34 new customers from $8,400	same period last year: not in the data

Cost to win a customer, by month

All · $ per new customer

All · New customers

Customers are counted in the month of their first job. Every month, by line, is in the spreadsheet download.

What it shows

37 new customers came from $8,400 of marketing in March, against 39 from $8,600 in February: $227 each, up from $221.

What you'd do about it

Worth knowing which channels brought this month's customers in: recording the source of each new customer shows the cost per channel.
