The Fourth Sheet

Example report · SMEs

SAMPLE DATA · invented figures for demonstration

What does it cost to win a customer?

Period: May 2026. Marketing spend divided by the customers it actually brought in (a customer's first ever job), month by month.

How final is this data?

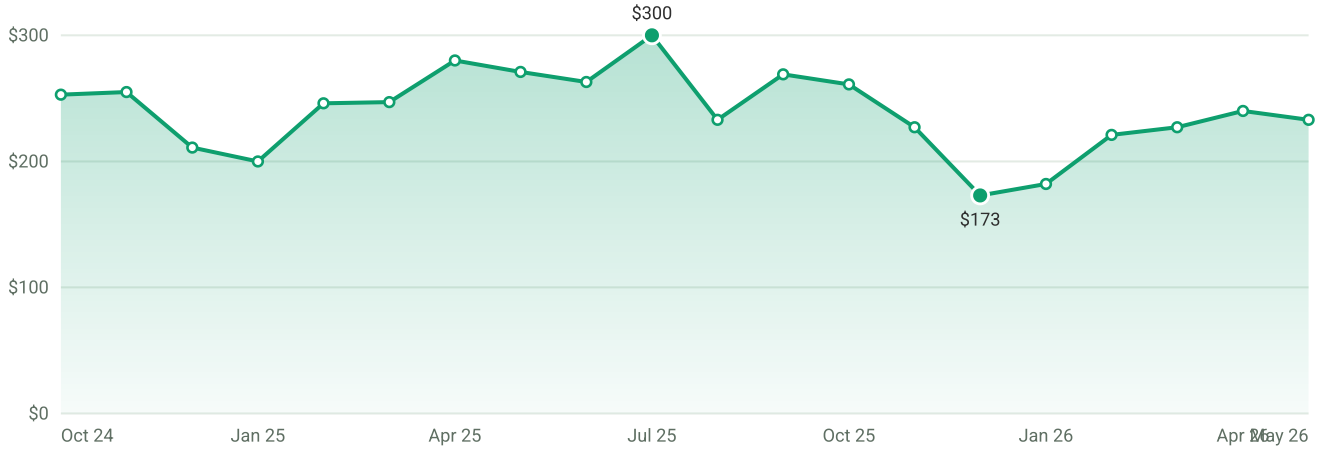

May 2026 Locked May 2026 is locked (closed 2 Jun 2026). These numbers won't change.

In short: $233 per new customer in May: 36 new customers from $8,400 of marketing.

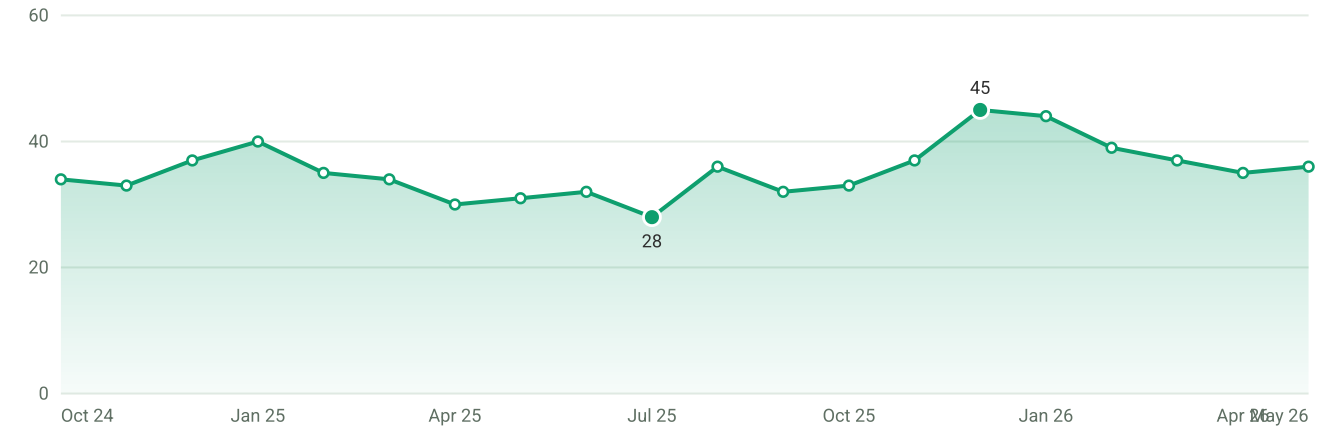

May 2026	May last year	Year to date (Jul to May 2026)
$233	**$271**	**$229**
April $240	31 new customers from $8,400	same period last year: not in the data

Cost to win a customer, by month

All · $ per new customer

All · New customers

Customers are counted in the month of their first job. Every month, by line, is in the spreadsheet download.

What it shows

36 new customers came from $8,400 of marketing in May, against 35 from $8,400 in April: $233 each, down from $240.

What you'd do about it

A lower cost per customer with steady spend usually means the marketing mix is working. Recording where each new customer came from shows the cost per channel.
