The Fourth Sheet

Example report · SMEs

SAMPLE DATA · invented figures for demonstration

What does it cost to win a customer?

Period: June 2026. Marketing spend divided by the customers it actually brought in (a customer's first ever job), month by month.

How final is this data?

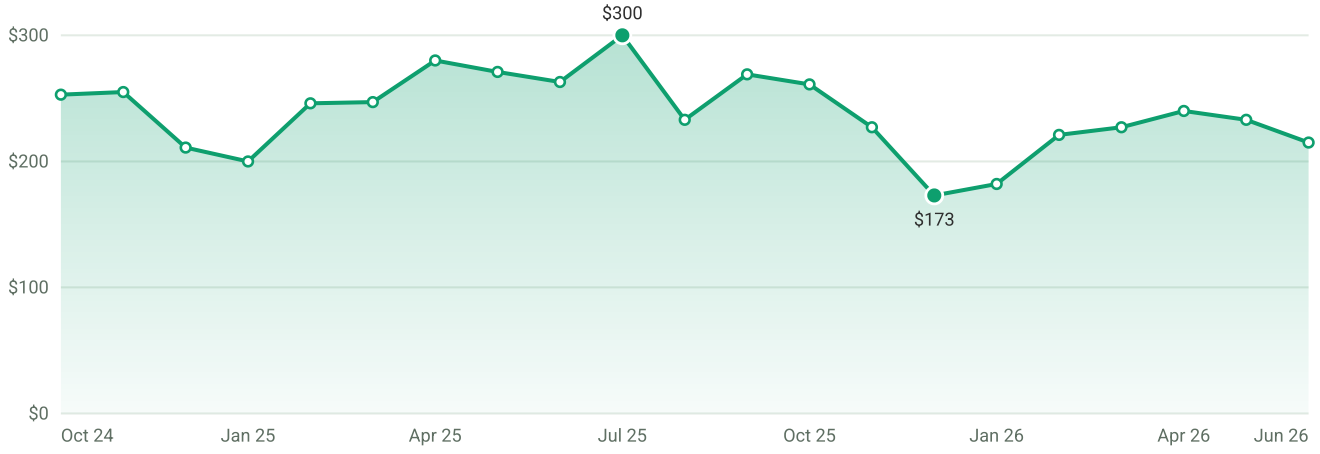

June 2026 Locked June 2026 is locked (closed 2 Jul 2026). These numbers won't change.

In short: $215 per new customer in June: 39 new customers from $8,400 of marketing.

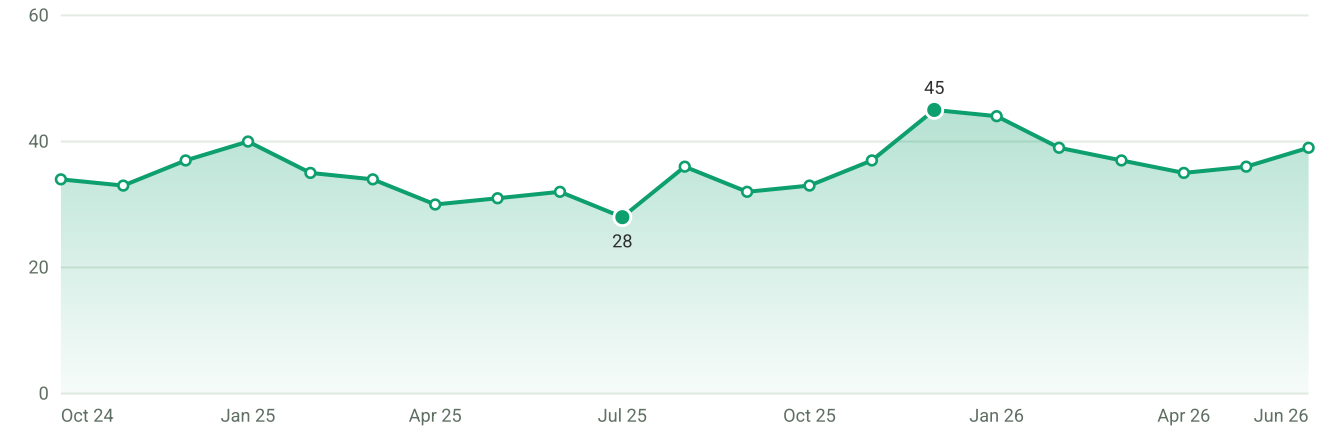

June 2026	June last year	Year to date (Jul to Jun 2026)
$215	**$263**	**$228**
May $233	32 new customers from $8,400	same period last year: not in the data

Cost to win a customer, by month

All · $ per new customer

All · New customers

Customers are counted in the month of their first job. Every month, by line, is in the spreadsheet download.

What it shows

39 new customers came from $8,400 of marketing in June, against 36 from $8,400 in May: $215 each, down from $233.

What you'd do about it

A lower cost per customer with steady spend usually means the marketing mix is working. Recording where each new customer came from shows the cost per channel.
