SAMPLE DATA · invented figures for demonstration

# What does it cost to win a customer?

**Period: September 2026.** Marketing spend divided by the customers it actually brought in (a customer's first ever job), month by month.

### How final is this data?

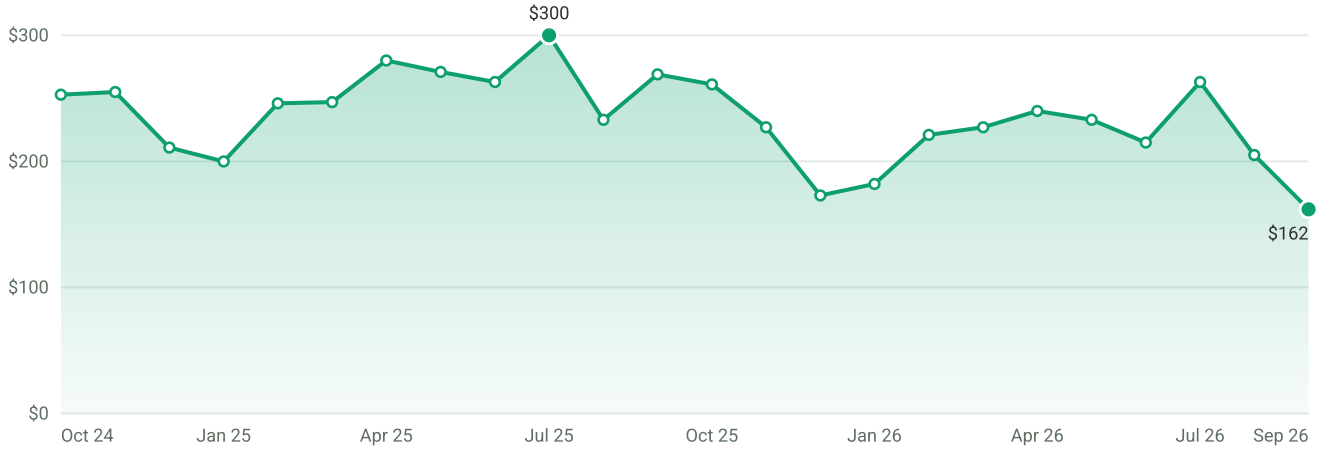

**September 2026** Locked September 2026 is locked (closed 2 Oct 2026). These numbers won't change.

**In short: $162 per new customer in September: 47 new customers from $7,600 of marketing.**

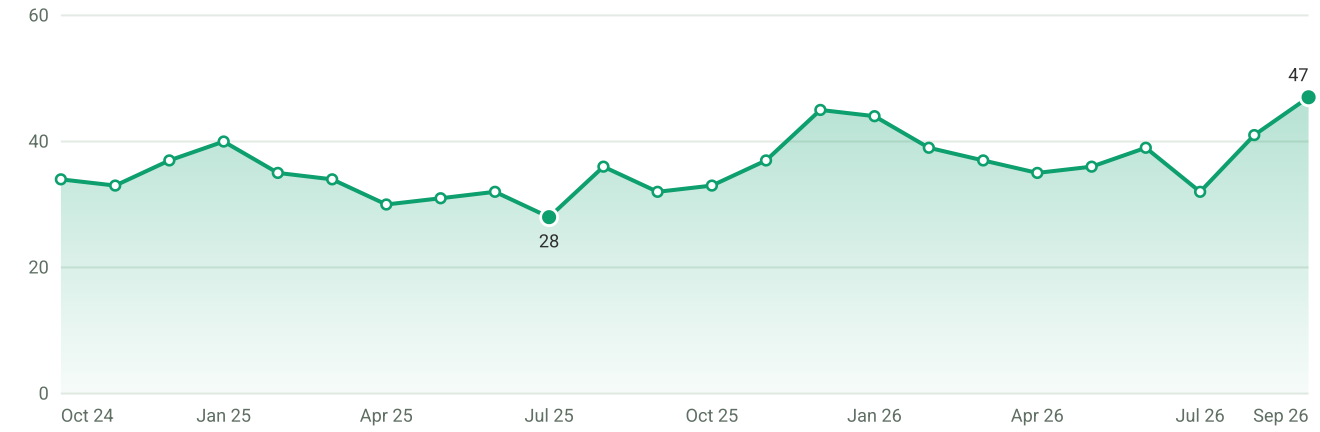

| September 2026 | September last year | Year to date (Jul to Sep 2026) |
|---|---|---|
| **$162** | **$269** | **$203** |
| August $205 | 32 new customers from $8,600 | (23.1%) on the same period last year ($265) |

## Cost to win a customer, by month

All · $ per new customer

All · New customers

Customers are counted in the month of their first job. Every month, by line, is in the spreadsheet download.

### What it shows

47 new customers came from $7,600 of marketing in September, against 41 from $8,400 in August: $162 each, down from $205.

### What you'd do about it

A lower cost per customer with steady spend usually means the marketing mix is working. Recording where each new customer came from shows the cost per channel.
