SAMPLE DATA · invented figures for demonstration

# What does it cost to win a customer?

**Period: July 2026.** Marketing spend divided by the customers it actually brought in (a customer's first ever job), month by month.

### How final is this data?

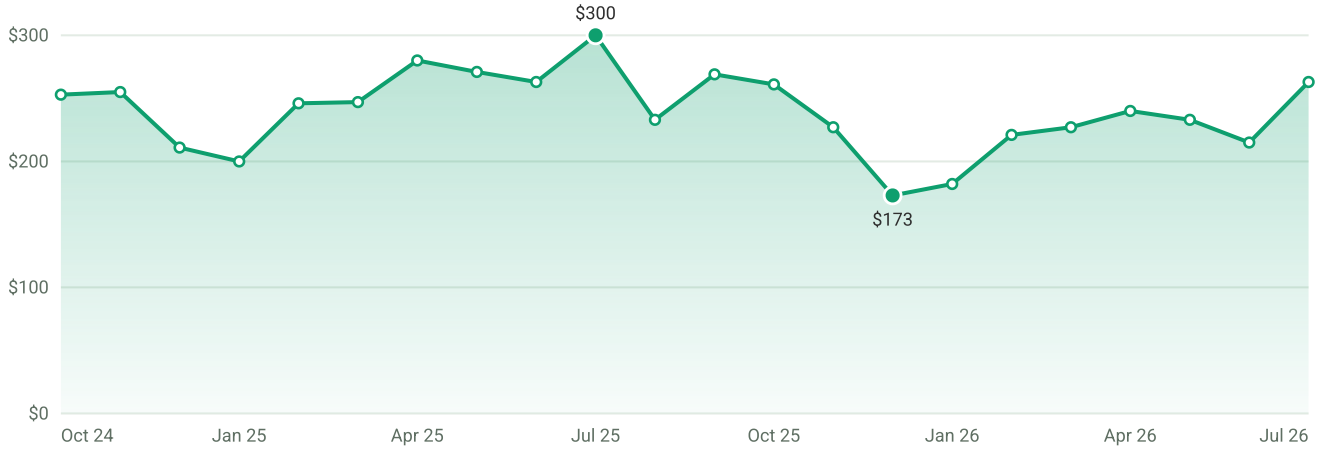

**July 2026** Locked July 2026 is locked (closed 4 Aug 2026). These numbers won't change.

**In short: $263 per new customer in July: 32 new customers from $8,400 of marketing.**

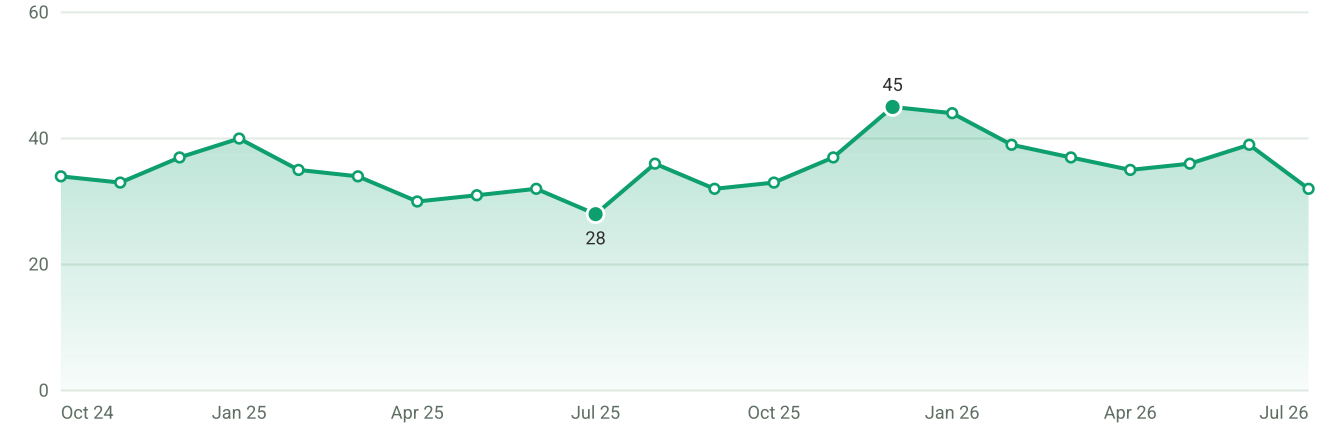

| July 2026 | July last year | Year to date (Jul 2026) |
|---|---|---|
| **$263** | **$300** | **$263** |
| June $215 | 28 new customers from $8,400 | (12.5%) on the same period last year ($300) |

## Cost to win a customer, by month

**All · $ per new customer**

**All · New customers**

Customers are counted in the month of their first job. Every month, by line, is in the spreadsheet download.

### What it shows

32 new customers came from $8,400 of marketing in July, against 39 from $8,400 in June: $263 each, up from $215.

### What you'd do about it

Worth knowing which channels brought this month's customers in: recording the source of each new customer shows the cost per channel.
